What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The Issuer is subject to intra-group credit risk. From time to time, the Issuer enters into derivative transactions with CGML to offset or hedge its liabilities to securityholders under securities issued by it (which may include the Securities). As such, the Issuer is exposed to the credit risk of CGML in the form of counterparty risk in respect of such derivative transactions. In particular, the Issuer's ability to fulfil its obligations under the Securities is primarily dependent on CGML performing its counterparty obligations owed to the Issuer in respect of such derivative transactions in a timely manner, and any failure by CGML to do so will negatively affect the ability of the Issuer to fulfil its obligations under the Securities. Securityholders will not have any recourse to CGML under any such derivative transactions.
- The Issuer may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Issuer and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.⁸

Qualifications in audit report on historical financial information: There are no qualifications in the audit report of the Guarantor on its audited historical financial information.

Key risks in respect of the Guarantor: The Guarantor is subject to the following key risks:

- The Guarantor is exposed to concentrations of risk, particularly credit and market risk. As regulatory or market developments continue to lead to increased centralisation of trading activities, the Guarantor could experience an increase in concentration of risk, which could limit the effectiveness of any hedging strategies and cause the Guarantor to incur significant losses. The Guarantor may be affected by macroeconomic, geopolitical and other

⁹ The key financial information regarding the Guarantor is updated to reflect the CGMFL Underlying Linked Notes Base Prospectus Supplement (No.10) dated 1 December 2021.

challenges, uncertainties and volatilities, including the global COVID-19 pandemic, which may negatively impact the businesses of the Guarantor and its ability to fulfil its obligations under the Securities, and the value of and return on the Securities.

- The Guarantor may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Guarantor and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.
- If the relevant resolution authority is satisfied that the Guarantor is failing or likely to fail, and subject to certain other conditions being satisfied, the Guarantor may be subject to action taken by the resolution authority, including potentially the write down of claims of unsecured creditors of the Guarantor (such as under the deed of guarantee) and the conversion of unsecured debt claims (such as the under the deed of guarantee) to other instruments (e.g. equity shares), the transfer of all or part of the Guarantor's business to another entity, or other resolution measures. As a result of any such action, investors could lose some or all of their investment in the Securities.

What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

- You should be prepared to sustain a total or partial loss of the purchase price of your Securities. The value of Securities prior to their scheduled redemption may vary due to a number of interrelated factors, including the value, dividend yield and volatility of the Underlying(s) and any changes in interim interest rates if applicable, and a sale of Securities prior to their scheduled redemption may be at a substantial discount from the original purchase price and you may lose some or all of your investment. If, at maturity, a Redemption Barrier Event has occurred, the Securities may be redeemed for less than your initial investment or even zero. Further, you will receive no interest during the term of the Securities.¹⁰
- The Issuer's obligations under the Securities and the Guarantor's obligations under the deed of guarantee represent general contractual obligations of each respective entity and of no other person. Accordingly, payments under the Securities are subject to the credit risk of the Issuer and the Guarantor. Securityholders will not have recourse to any secured assets of the Issuer and Guarantor in the event that the Issuer or Guarantor is unable to meet its obligations under the Securities, including in the event of an insolvency, and therefore risk losing some or all of their investment.
- Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold the Securities until maturity. If a market does develop, it may not be very liquid. Consequently, you may not be able to sell your Securities easily or at all or at prices equal to or higher than your initial investment and in fact any such price may be substantially less than the original purchase price. Illiquidity may have a severely adverse effect on the market value of Securities.
- Amounts due in respect of the Securities are linked to the performance of the Underlying(s), which is a security index. Global economic, financial and political developments, among other things, may have a material effect on the value of the component securities of, and/or the performance of, the Underlying(s), and in recent years, currency exchange rates and prices for component securities have been highly volatile. This may in turn affect the value of and return on the Securities.
- The Securities do not create an actual interest in, or ownership of, an Underlying. A Security will not represent a claim against an Underlying and, in the event that the amount paid on redemption of the Securities is less than your investment, you will not have recourse under any relevant Security to an Underlying or other items which may comprise the Underlying(s) in respect of such Securities. You will have no legal or beneficial interest in an Underlying. You may receive a lower return on the Securities than you would have received had you invested directly in an Underlying or through another product.
- The terms and conditions of Securities include provisions dealing with the postponement of dates on which the level of an Underlying is scheduled to be taken. Such postponement or alternative provisions for valuation provided in the terms and conditions of the Securities may have an adverse effect on the value of such Securities.
- The calculation agent may make adjustments to the terms of the Securities to account for the effect of certain adjustment events occurring in respect of the Securities or an Underlying and/or hedging arrangements, or may replace an Underlying with a new security index. Any such adjustments may have an adverse effect on the value of such Securities.
- In certain circumstances (for example, if the calculation agent determines that no calculation, adjustment or substitution can reasonably be made, following an event of default or certain events affecting an Underlying or the Issuer's hedging arrangements, or for reasons relating to taxation or illegality), the Securities may be early redeemed. If the Securities are redeemed early, the amount paid may be less than your initial investment and you may therefore sustain a loss.
- Following the occurrence of a Mandatory Early Redemption Barrier Event, the Securities will be redeemed on the relevant Mandatory Early Redemption Date at the relevant Mandatory Early Redemption Amount. No further amount shall be payable in respect of the Securities after the Mandatory Early Redemption Date. In this case, you are subject to a reinvestment risk, as you may not be able to replace your investment in the Securities with an investment that has a similar profile of chances and risks as the Securities.

Quels sont les risques clés spécifiques à l'Émetteur?

L'Émetteur est soumis aux risques clés suivants:

- L'Émetteur fait face à un risque de crédit intra-groupe. De temps à autre, l'Émetteur conclut des opérations sur produits dérivés avec CGML pour compenser ou couvrir ses obligations envers les détenteurs de titres en vertu des titres émis par lui (qui peuvent inclure les Titres). À ce titre, l'Émetteur est exposé au risque de crédit de CGML sous la forme d'un risque de contrepartie dans le cadre de ces transactions sur produits dérivés. En particulier, la capacité de l'Émetteur à remplir ses obligations en vertu des Titres dépend principalement de la capacité de CGML à s'acquitter en temps voulu de ses obligations de contrepartie envers l'Émetteur dans le cadre de ces opérations sur produits dérivés, et tout manquement de CGML à cette obligation peut avoir un effet négatif sur la capacité de l'Émetteur à remplir ses obligations en vertu des Titres. Les détenteurs de titres n'auront aucun recours contre CGML dans le cadre de ces opérations sur produits dérivés.
- L'Émetteur peut ne pas être en mesure de maintenir ses notations actuelles. Si une agence de notation réduit, suspend ou retire sa notation de l'Émetteur et/ou de toute société affiliée à celui-ci, la liquidité et la valeur de marché des Titres risquent d'être affectées de manière négative. La dégradation des notations pourrait également avoir un impact négatif sur d'autres sources de financement, telles que les financements garantis et autres exigences de marge, pour lesquels il n'existe pas de déclencheur explicite⁵.

Réunions: Les termes et conditions des Titres contiennent des dispositions relatives à la convocation d'assemblées des détenteurs afin d'examiner les questions touchant à leurs intérêts en général. Réerves dans le rapport d'audit sur les informations financières historiques: Le rapport d'audit ne contient aucune réserve concernant les informations financières historiques auditées du Garant qui y figurent.

Facteurs de risques associés au Garant: Le Garant est soumis aux principaux risques suivants:

- Le Garant est exposé à des concentrations de risques, en particulier le risque de crédit et le risque de marché. L'évolution de la réglementation ou du marché continuant à entraîner une centralisation accrue des activités de négociation, le Garant pourrait connaître une augmentation de la concentration des risques, ce qui pourrait limiter l'efficacité de toute stratégie de couverture et entraîner des pertes importantes pour le Garant. Le Garant peut être affecté par des défis macroéconomiques, géopolitiques et autres, des incertitudes et des volatilités, y compris la pandémie mondiale de COVID-19, ce qui pourrait avoir un impact négatif sur les activités du Garant et sa capacité à remplir ses obligations en vertu des Titres, ainsi que sur la valeur et le rendement des Titres.
- Le Garant pourrait ne pas être en mesure de maintenir sa notation actuelle. Si une agence de notation réduit, suspend ou retire sa notation du Garant et/ou de toute société affiliée à celui-ci, la liquidité et la valeur de marché des Titres risquent d'être affectées négativement. La dégradation des notations pourrait également avoir un impact négatif sur d'autres sources de financement, telles que le financement garanti et d'autres exigences de marge, pour lesquelles il n'existe pas de déclencheur explicite.
- Si l'autorité de résolution pertinente est assurée que le Garant est défaillant ou susceptible de l'être, et sous réserve que certaines autres conditions soient remplies, le Garant peut faire l'objet de mesures prises par l'autorité de résolution, y compris potentiellement la dépréciation des créances des créanciers non garantis du Garant (tel que dans le cadre de l'acte de garantie) et la conversion des créances non garanties (tel que dans le cadre de l'acte de garantie) en d'autres instruments (par exemple des actions), le transfert de tout ou partie des activités du Garant à une autre entité, ou d'autres mesures de résolution. À la suite d'une telle mesure, les investisseurs pourraient perdre tout ou partie de leur investissement dans les Titres.

Quels sont les risques clés spécifiques aux Titres?

Les Titres sont soumis aux risques principaux suivants:

- Vous devez être préparé à subir une perte totale ou partielle du prix d'achat de vos Titres. La valeur des Titres avant leur remboursement prévu peut varier en raison d'un certain nombre de facteurs interdépendants, y compris la valeur, les rendements de dividendes et la volatilité du ou des Sous-Jacent(s) et tout changement dans les taux d'intérêt intermédiaires le cas échéant, et une vente de Titres avant leur remboursement prévu peut se faire à un rabais substantiel par rapport au prix d'achat initial et vous pouvez perdre une partie ou la totalité de votre investissement. Si, à l'échéance, un Événement de Barrière de Remboursement s'est produit, les Titres peuvent être remboursés à un montant inférieur à votre investissement initial ou même égal à zéro. En outre, vous ne recevrez aucun intérêt pendant la durée des Titres⁷.
- Les obligations de l'Émetteur en vertu des Titres et les obligations du Garant en vertu de l'acte de garantie représentent des obligations contractuelles générales de chaque entité respective et d'aucune autre personne. En conséquence, les paiements effectués en vertu des Titres sont soumis au risque de crédit de l'Émetteur et du Garant. Les détenteurs de Titres n'auront aucun recours sur les actifs garantis de l'Émetteur et du Garant dans le cas où l'Émetteur ou le Garant ne serait pas en mesure de remplir ses obligations en vertu des Titres, y compris en cas d'insolvabilité, et risquerait donc de perdre tout ou une partie de son investissement.
- Les Titres peuvent ne pas avoir de marché de négociation établi au moment de leur émission, et il se peut qu'il n'y en ait jamais, de sorte que les investisseurs doivent être prêts à les conserver jusqu'à leur échéance. Si un marché se développe, il se peut qu'il ne soit pas très liquide. Par conséquent, il se peut que vous ne puissiez pas vendre vos Titres facilement ou pas du tout ou à des prix égaux ou supérieurs à votre investissement initial et, en fait, ce prix peut être sensiblement inférieur au prix d'achat initial. L'illiquidité peut avoir un effet très négatif sur la valeur de marché des Titres.
- Les montants dus pour les Titres sont liés à la performance du(des) Sous-Jacent(s), qui est(sont) un(des) indice(s) de titres. Les développements économiques, financiers et politiques mondiaux, entre autres, peuvent avoir un effet important sur la valeur des titres composant le(s) Sous-Jacent(s) et/ou sur la performance de ce(s) dernier(s) et, ces dernières années, les taux de change et les cours des titres composant le(s) Sous-Jacent(s) ont été très volatiles. Ceci peut à son tour affecter la valeur et le rendement des Titres.

⁷ Les risques clés spécifiques aux Titres sont mis à jour pour refléter le CGMFL Underlying Linked Notes Base Prospectus en date du 17 décembre 2021.

- Les Titres ne créent pas un intérêt réel dans le Sous-Jacent ou un droit de propriété sur celui-ci. Un Titre ne représente pas une créance à l'encontre d'un Sous-Jacent et, dans le cas où le montant payé au remboursement des Titres est inférieur à votre investissement, vous n'aurez aucun recours, en vertu d'un Titre quelconque, contre le Sous-Jacent ou d'autres éléments qui peuvent comprendre le(s) Sous-Jacent(s) en ce qui concerne ces Titres. Vous n'aurez aucun intérêt légal ou bénéficiaire dans un Sous-Jacent. Il est possible que le rendement des Titres soit inférieur à celui que vous auriez obtenu si vous aviez investi directement dans un Sous-Jacent ou par l'intermédiaire d'un autre produit.
- Les termes et conditions des Titres comprennent des dispositions relatives au report des dates auxquelles le niveau d'un Sous-Jacent doit être relevé. Un tel report ou des dispositions alternatives d'évaluation prévues dans les termes et conditions des Titres peuvent avoir un effet négatif sur la valeur de ces Titres.
- L'agent de calcul peut apporter des ajustements aux conditions des Titres pour tenir compte de l'effet de certains événements d'ajustement se produisant à l'égard des Titres ou d'un Sous-Jacent et/ou des arrangements de couverture, ou peut remplacer un Sous-Jacent par un nouvel indice de titres. De tels ajustements peuvent avoir un effet négatif sur la valeur de ces Titres.
- Dans certaines circonstances (par exemple, si l'agent de calcul détermine qu'aucun calcul, ajustement ou substitution ne peut raisonnablement être effectué, à la suite d'un cas de défaut ou à la suite de certains événements affectant un Sous-Jacent ou les arrangements de couverture de l'Émetteur, ou pour des raisons liées à la fiscalité ou à l'ilégalité), les Titres peuvent être remboursés par anticipation. Si les Titres sont remboursés par anticipation, le montant payé peut être inférieur à votre investissement initial et vous pourriez donc subir une perte.
- En cas de survenance d'un Événement de Barrière de Remboursement Anticipé Obligatoire, les Titres seront remboursés à la Date de Remboursement Anticipé Obligatoire pertinente au Montant de Remboursement Anticipé Obligatoire pertinent. Aucun autre montant ne sera dû pour les Titres après la Date de Remboursement Anticipé Obligatoire. Dans ce cas, vous êtes soumis à un risque de réinvestissement, car il se peut que vous ne puissiez pas remplacer votre investissement dans les Titres par un investissement présentant un profil de perspectives et de risques similaire à celui des Titres.
